RICE

3 Courses

Parallel Programming in Java

Concurrent Programming in Java

Distributed Programming in Java

11/19/2018

Maksim A Khrapov

has successfully completed the online, non-credit Specialization

Parallel, Concurrent, and Distributed Programming in Java

This specialization is intended for anyone with basic knowledge of sequential programming in Java, who is motivated to learn how to program multicore processors. Through a sequence of three courses, you will learn foundational topics in Parallelism, Concurrency, and Distribution, which will prepare you for multithreaded and distributed programming for a wide range of computer platforms from mobile devices to cloud computing servers.
